- ✓ Generate statistical and graphical reports

We can help your business

Our solution is tailored to your needs, so whether you are a small, medium, or large business, Fingera can help you.

For Small Companies

For Medium-sized Companies

For Large Companies

Certified Solution

Innovatrics biometric technologies are ranked among the fastest and most accurate in the world.

Certified by NIST (National Institute of Standards and Technology).

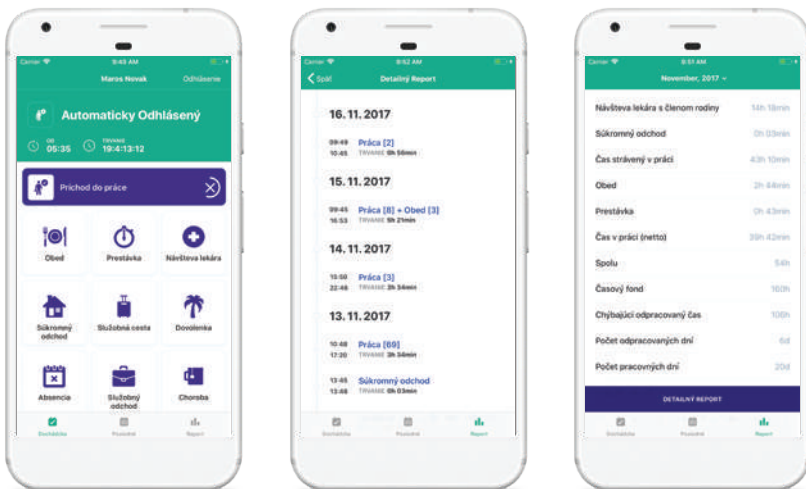

Simple & Fast Attendance Recording

Attendance Terminals

Industry-leading biometric terminals ensure Fingera performs quickly and reliably.

The indoor and outdoor terminals provide convenient recording of attendance, which can, moreover, be used for opening doors automatically. Terminals monitor the movement of employees across a site by recording their entries into individual buildings, warehouses, etc.

Fingera Mobile

Fingera Mobile offers the full use of the Fingera attendance system including geolocation through the mobile or tablet device.

Simple recording of attendance activities and quick reviews will be appreciated by companies, which have employees in their ranks such as merchants and service technicians who need to record their attendance outside the workplace.

Managing Attendance Online

Fingera offers online access to data over the Internet via a dedicated website called companyname.fingera.com.

Management and administrators have the ability to access employees' reports and statistics at any time from any device connected to the Internet.
